

19 January 1973

MEMORANDUM FOR: Members of SIGINT Committee Ad Hoc Group
on Requirements Satisfaction

SUBJECT : Minutes of the Sixth Meeting, 18 January 1973

1. Attendees were:

25X1

2. The group continued discussion of the Telemetry problem. Four alternative box score schemes were presented. Three of these will be refined, discussed further next week and, hopefully, the following week will see a test of each against a specific event. The purpose of this test is to get an estimate of how much effort is needed to fill out the form and to determine the availability of input data.

Chairman
